## Summary

I'm a passionate software developer based in Soweto. My programming journey started back in 2014, Not knowing I'll fall in love, and ever since I never looked back. My work is focused on both back-end and front-end applications, and I enjoy doing both.

My expertise lies in developing high-quality software solutions across different domains. I am well-versed in JAVA, JavaScript, C#, PHP, Python, Microsoft SQL, Oracle PL/SQL, HTML, CSS, allowing me to adapt to different projects and contribute effectively to their success. I have a strong understanding of software development principles, algorithms, and data structures, which enables me to design efficient and optimised code.

I'm currently a software development student at WeThinkCode\_, where I'm learning a lot of new things like Brownfields Development, Socket programming, and using tools like Git.

## Experience

### Salesforce Developer (Trainee)

Phvnnel

Jul 2021 - Dec 2021 (6 months)

I was a Salesforce Developer Trainee for 5 months (from July 2021 to November 2021).
